Objective

Computer Science undergraduate with a strong focus on backend development, seeking a summer internship to contribute to scalable, data-driven systems. Hands-on experience with Node.js, REST API development, and database architecture, capable of designing, building, and optimizing efficient backend solutions, with exposure to full-stack development for complete end-to-end delivery.

Skills

Languages: Python, C/C++, JavaScript, SQL, PHP

Technologies & Tools: Git, GitHub, Node.js, REST APIs, PostgreSQL, MySQL, Oracle, Canva, Django, React(basics), HTML, CSS, Bootstrap

Area of Interest: Backend Development, Data Structures & Algorithms, Problem Solving

Soft Skills: Teamwork & Collaboration, Communication

Work Experience

Lenovo, India

June 2025 – August 2025

Web Developer Intern

(Remote)

- Developed responsive and user-friendly web pages using HTML, CSS, Bootstrap, and JavaScript.
- Gained hands-on experience in modern front-end development practices and version control using Git

Education

St. Andrew's Higher Secondary School, Goa

January 2023

Relevant Coursework: Physics, Chemistry, Mathematics, C++ Programming, English

Percentage: 82%

Padre Conceição College Of Engineering, Goa

2023 - 2027

B.E. in Computer Science and Engineering

CGPA: 8.6/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Advance Data Structures and Algorithms, Microprocessors.

Project Work

NASA Asteroid Data Analyzer(2025): Built a Python FastAPI backend integrating NASA Open APIs to analyze Near-Earth Object data and persist asteroid metrics in PostgreSQL. Exposed REST endpoints for hazard and velocity-based analysis. Tech: Python, FastAPI, PostgreSQL, REST APIs, JSON

Environmental Incident Reporting System(2025): Built an Environmental Incident Reporting System using Node.js, Express, PostgreSQL, HTML, CSS to manage user reports, store data securely, and automate response workflows.

JARVIS USING PYTHON -VoiceActivated Automation Tool (2024): Developed a Python-based desktop assistant that performs tasks like sending emails, playing music, launching websites, and opening IDEs via voice commands. Utilized libraries such as pyttsx3, speech_recognition, smtplib, os to implement TTS, voice input automation features.

Participations and Certificates

CERTIFICATIONS:

- Full-Stack Web Development – **Udemy**
- Data Structures and Algorithms – **Udemy**
- Building Real-World Generative AI Applications with Gemini & Imagen – **Google**
- Software Engineering Virtual Experience – **JPMorgan Chase (Forage)**

PARTICIPATION & ACHIEVEMENTS:

1st Place – 24-Hour State-Level Hackathon (2026): Designed and developed SeaChain, a blockchain-inspired seafood supply chain tracking system using Node.js and Express. Implemented hash-based ledger logic, role-based data validation, and tamper-detection mechanisms to ensure traceability from fisherman to retailer.

Participant (2025)– 24-Hour Hackathon: AAHAR(Smart Nutrition Tracker) Built a smart meal planning website that tracks water intake, supports all age groups including pregnant women, and uses food scanning to estimate leftover carbs and expiration.

Group Participation – E-Summits: IIT Bombay (2025) and E-Summit Launchpad ,BITS Hyderabad (2026).
